SUMMARY

Economist with a strong background in data science and a passion for solving real-world problems. I have extensive experience conducting economic research, collecting, and analyzing data, and developing and testing mathematical models. I have applied my skills to various domains, such as banking, finance, public policy, and consulting. I am proficient in using statistical software, such as R, Python, and Stata, and data visualization tools like Tableau and Power BI. I am always eager to learn new techniques and methods to enhance my analytical abilities and deliver high-quality results.
